

An aerial photograph of the New York City skyline during sunset. The sky is filled with soft, pink and orange clouds. In the foreground, the One Wall Street building is prominent, a tall, modern skyscraper with a grid-like facade. To its left, the Empire State Building is visible, its iconic Art Deco spire reaching towards the sky. Other various skyscrapers and buildings of the city are scattered across the frame, creating a dense urban landscape. The overall mood is serene and majestic.

# One Wall Street New York (USA)

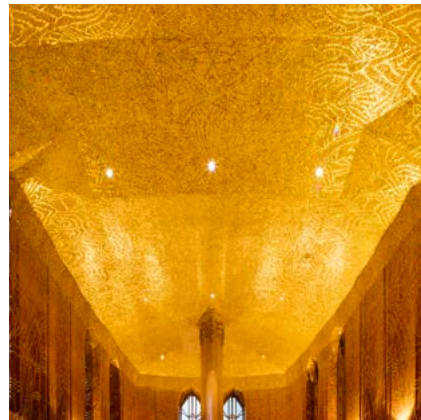

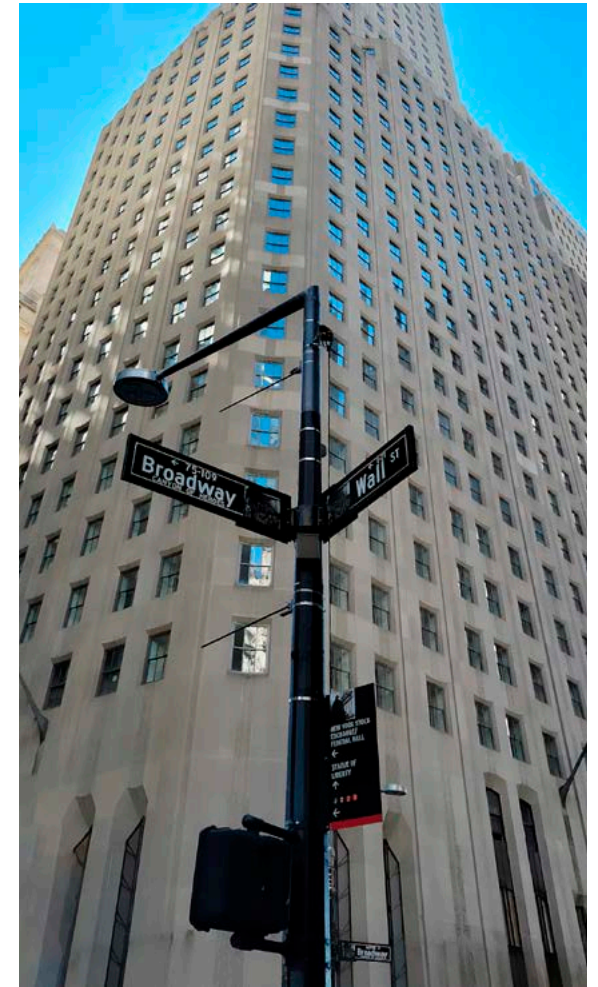

SICIS

# ONE WALL STREET

*1931 Ralph Walker - designed art-deco tower, which began its life as the headquarters of the Irving Trust, is now the largest office-to-condo conversion in New York City history and features 100,000 square feet of luxury amenities. Riffing off the striking landmarked lobby of fire reds and gold handmade mosaics, the amenities spaces push the conversation to a light filled, serene and surreal space on top of the New York City downtown world.*

*Sicis unique shimmering mosaics while recalling that past, speak to the future. The mosaic covered deco inspired Ceilings, Columns and Walls gently reflect and refract, interacting with the subtle changes of light throughout the day, creating a spirit and a mood that can never be experienced the same way twice.*
